

ART 34 AMDT

CLAIMS

1. A dishwashing machine provided with a door which is arranged in such a way that it is pivotable around the horizontal axis thereof, characterised in that a switch (4) is arranged on the door (2) and embodied in such a way that it generates an electric signal when a certain pivoting angle of the opened door (2) is reached.
2. The dishwashing machine according to claim 1, characterised in that the switch (4) is arranged inside the door (2).
3. The dishwashing machine according to claim 1 or 2, characterised in that the electric signal switches on a light source (5) which illuminates the interior of the dishwashing machine (1).
4. The dishwashing machine according to claim 1 or 2, characterised in that the electric signal switches on a light source (5) which illuminates the inner wall of the opened door (2), especially a crockery basket (3) arranged thereon.
5. The dishwashing machine according to claim 1 or 2, characterised in that the electric signal triggers an acoustic signal (8).
